Research Interests

Energy economics and electricity market design, environmental regulation and carbon pricing, applied microeconometrics and policy evaluation.

Education

University of Cologne

Cologne, Germany

M.Sc. Economics, 120 ECTS. Overall 1.6 (German scale, 1.0 highest)

Oct. 2023 – Sep. 2026

- Master's thesis **1.0**. Mathematics for Economists **1.0**. Econometrics **1.3**. Energy Markets and Regulation **1.3**.
- Available from October 2026.

Rotterdam School of Management (RSM), Erasmus University

Rotterdam, Netherlands

Erasmus+ Exchange Semester. Asset Pricing, Derivatives Valuation

Sep. 2024 – Dec. 2024

University of Cologne

Cologne, Germany

B.Sc. Economics, 1.6. Top 5 % of cohort, Dean's List

Oct. 2019 – Feb. 2023

Energy Economics

Seminar paper: the EU Emissions Trading System

University of Cologne

Specialisation seminar, Markets and Economic Policy

2026

- Analysis of the EU ETS as a market instrument for a global public good, covering allowance supply, price formation and the incentives the scheme creates for abatement investment.

Energy and Climate Change I: Energy Markets and Regulation

University of Cologne

Examiner: Jun.-Prof. Dr. Oliver Ruhnau (EWI) | Grade: 1.3

2025

- Electricity market design, network regulation, and the instruments used to support and integrate renewable generation.

Energy and Climate Change II: Growth, Energy, Climate Change

University of Cologne

Examiner: PD Dr. Dietmar Lindenberger (EWI) | Grade: 2.3

2025

Research Experience

Master's Thesis

University of Cologne

Grade 1.0/1.0. Supervisors: Prof. Dr. Pia Pinger and Anna Person, M.Sc.

Oct. 2025 – Apr. 2026

- **Title:** *How Equal is Equal Opportunity? Gender, Ethnic and Regional Disparities in Labor Market Outcomes of Higher Education Policies in Brazil.*
- Estimated the causal labour-market effects of a national scholarship programme across 558 regions over 2005–2019, using the Callaway and Sant'Anna (2021) heterogeneity-robust staggered difference-in-differences estimator with doubly-robust inference.
- Built the panel from administrative records, roughly five million linked employer–employee observations, in R through a BigQuery interface.
- Documented a non-monotonic dose–response whose sign two-way fixed effects reverses (−0.65 % against a corrected +3.04 %), an empirical case of forbidden comparisons (Goodman-Bacon, 2021).
- Robustness: HonestDiD sensitivity analysis (Rambachan and Roth, 2023), Bacon decomposition, age-cohort placebo, alternative exposure cutoffs, concurrent-policy controls.

Bachelor's Thesis

University of Cologne

Supervisor: Univ.-Prof. Dr. Andreas Schabert | Grade: 1.7

2022 – 2023

- *The Financial Accelerator Mechanism.* Theoretical review of financial frictions and macroeconomic amplification, centred on Bernanke, Gertler and Gilchrist (1999).

Technical Skills

- **R** (advanced: `did`, `fixest`, `HonestDiD`, `tidyverse`), SQL and BigQuery, Python (basic), $\text{\LaTeX}$.
- **Methods:** Difference-in-Differences including staggered adoption and doubly-robust estimation, event studies, panel data models, instrumental variables.

Professional Experience

PwC Germany

Düsseldorf, Germany

Intern and Working Student, Assurance Solutions

Mar. 2023 – Jul. 2025

- Two consecutive annual audits for the same client (HGB/IFRS, balance sheets above EUR 500 million), plus documentation on several smaller engagements.
- Audited sustainability disclosures under ISAE 3000 and performed internal control testing.

Languages

- German (native), Tunisian Arabic (native), English (C1, IELTS Academic 8.0), French (B1, DELF).
